Ravi Varu
Software Engineer

- Backend Developer - 90%
- Android Developer - 75%
- Flutter Developer - 75%
- DevOps Engineer - 70%

Profile

I am approaching 8.5+ years of experience in Software Development. My proficiency with both Backend and Frontend along with mobile app development has led me to develop a comprehensive understanding of the overall system. The art of different buautiful system design always amuse me and grab me into it. Alongside a penchant for picking up knowledge, I'm savvy enough to apply it within the given guidelines.

Work Experience

Sahaj Software `2022 to Present`
Solution Consultant

Here as a *Solution Consultant*, I learnt ideal way of doing things which changed my mindset to approach problems differently. Here I was responsible for

- Driving & Developing a microservice based project along with many experianced teammates
- Architechural design decision for the new features/services
- Set up and manage infra as a code (IaC) using terraform as part of development
- Enahance lagacy system gradually

Neebal Technologies `2015 to 2022`
Technical Architect

From *Assosiate Software Developer* to *Technical Architect* I grew up a lot here as a Software Engineer. Here I was responsible for

- Development, Delivery, Maintenance of the apps
- Design architecture for the projects
- Client communication for setting up new things and for daily development
- Research work on new technologies - got my hands dirty on BLE communications, AR Core, ML Kit, AI Bot
- Setting up best practices for company

Crisil Limited `2019 to 2020` [Outsourced]
Sr. Software Engineer

An onsite opportunity to work closely with the **FAB Bank** for some of their mobile products. Here I was responsible for

- Architectural disscussion of the projects
- Communicate with different vendors for setting up things and for daily development
- Secure Distribution & Deployment of apps & servers to on-prem containers
